

[Nodon](#) 2.5 Tablet 15's belongs to the group of medicines called 'beta-blockers' used to treat hypertension (high blood pressure). Nodon 2.5 Tablet 15's is also used to treat mild to moderate heart failure in patients aged 70 years and older in addition to other therapies. High blood pressure is a health condition in which the pressure in the blood vessels is high. The blood exerts elevated pressure on the walls of blood vessels leading to hypertension. Heart failure occurs when the heart isn't able to pump sufficient blood to the remaining parts of the body.

## USA FAST DELIVERY

You are advised to take [Nodon](#) 2.5 Tablet 15's for as long as your doctor has prescribed it for you, depending on your medical condition. In some cases, you may experience certain common side

effects such as headache, nausea, dizziness, weakness, shortness of breath, low blood pressure, diarrhoea, unusual itching or tingling sensation, constipation, swollen feet, and hands. Most of these side effects do not require medical attention and will resolve gradually over time. However, you are recommended to talk to your doctor if you experience any of these side effects persistently.

## Uses of Nodon 2.5 Tablet 15's

Hypertension (high blood pressure)

## Medicinal Benefits

[Nodon](#) 2.5 Tablet 15's belongs to the group of medicines called 'beta-blockers' used to treat hypertension (high blood pressure). Additionally, Nodon 2.5 Tablet 15's also treats mild and moderate heart failure in patients aged 70 years and older in addition to other therapies. Nodon 2.5 Tablet 15's relaxes and widens the blood vessels making it easier for the heart to pump blood to all parts of the body. This helps in decreasing blood pressure and the risk of having a heart attack or stroke. Nodon 2.5 Tablet 15's helps in preventing increased heart rate and controls heart pumping strength.
